Quest Homes (Q Homes) is a home-grown Qatari brand, a 100% Qatari owned company created and managed by Al Ali'a International Investments. Its vision is to revolutionize the real estate services market in the areas of marketing, leasing, property management and corporate services for the residential real estate sector. Firstly operating in Qatar, Q Homes will then expand this successful business model to the rest of the GCC, in line with Qatar National Vision 2030, by way of expanding the reach of local enterprises to deliver products and services at the international level.

Q Homes' award-winning website gives potential tenants online access to the first real-time property database in Qatar complete with an Advanced Mapping feature. This displays the property in

relation to the nearest schools, hospitals, shopping centres, and nurseries.

Access to the patented Q Homes online tenant system includes Qatar's first e-maintenance system. Furthermore, it allows tenants to download documents, check the status of their lease and submit maintenance requests, all online.

Additionally, the patented Q Homes online landlord system allows a landlord to view the status of their property, documents, reports, and even pay invoices online as part of the Q Homes property management package.

Q Homes' unique e-marketing campaign brings thousands of website views per month. This allows landlords to market their properties in front of a wide and targeted audience of potential tenants and enables them to rent their properties more quickly and efficiently.
